**Description:** Water Main Replacement is an EBMUD 2014 project to install a new water main to replace the existing 10" main which has leaked several times in the last year. The scope of the project will consist of excavation/backfill, placement of new water main, connecting water services to customers, reconnection of existing fire hydrants, and restoration of pavement. This project is being performed in advance of the Town's upcoming Hartz Avenue Beautification Project.

Limits of the work area-- on Diablo Road (in front of Wells Fargo) heading west, turning north on Hartz Avenue to the Railroad Avenue intersection-- are highlighted in blue on the reverse side of this sheet. Downtown traffic will be impacted by the construction. Traffic control will be implemented during work hours. Two-way traffic will be maintained at all times. No road closures are allowed. Traffic signals will be temporarily converted to camera detection.

The Town-owned Rose Street parking lot will be used as a staging area by EBMUD.

Customers will be notified in advance of planned outages. EBMUD has distributed the attached notification letter to affected customers.
